*Customers outside the United States – for international product availability and pricing information, send us an Email at info@lumatec.com. Please include the specific product you are interested in and country in which you are located.

Limited Warranty

Lumatec warrants to the original purchaser of this product that all components (excluding flashlight bulb's metal contacts) will be free of any defects in materials and labor for 90 days from purchase. This warranty does not include defects created from improper usage, replacement lamps, or metal contacts that become defective as a result of mishandling or leaking batteries.

This warranty is limited to the repair or replacement of the original unit and is made to the original purchaser only. It is effective only upon presentation of a receipt proving date of purchase. For repair or replacement, send \$5 (US\$15 outside USA) to cover return postage and handling costs with your defective unit to the attention of, Customer Returns, at the address listed below:

Lumatec®
Manufacturer of High Performance Lights

* To insert batteries remove the belt clip.
Insert two AAA batteries as indicated.

Tool Usage

To use any tool, simply pull it free from the clips and snap it into place. You can feel when the tool has snapped into the open position. To close, simply apply pressure in the opposite direction, and push back into the clips. Note: Only one tool may be locked open at any time. Avoid trying to pry with the tools, as excessive force can cause the tool to unlock or even shatter.

Light Operation

To use the light, simply slide the clip forward in the direction of the arrow on the clip.

Battery Installation

To insert batteries, firmly push the clip straight back toward the rear of the tool, as if turning the light off. (See diagram above). In some cases very firm pressure may be required. One AAA battery is inserted into each cavity (total of 2 batteries) in the directions indicated.
